

8. (amended) The panel, as claimed in claim 7, characterized by the fact that the dragging means (10) of the towing means (6) are separated by a distance between them which is at least equal to the distance between the beaks (3) jutting from the load (4) to be dragged.

9. (amended) The panel, as claimed in claim 7, characterized by the fact that the deactivating beak (33) of said towing means (6) precedes the first dragging means (10) by at least the distance that will enable it to deactivate the switch (11) just before the first dragging means (10) reaches the longitudinal groove (2) inside the panel (1).

10. (amended) The panel, as claimed in claim 7, characterized by the fact that the deactivating beak (33) of said towing means (6) precedes the first dragging means (10) by very little in order to stop just before the switch (11), and said dragging means (10) being made to bend to allow the passage of the first beak (3) of the arriving load (4) with which the switch (11) is activated.
